

COLOR OF THE MONTH

Like Butter

We're happy to report that butter yellow decor is back in a big way. Soft and pretty, the color looks right at home with the florals and ornate trim "grandmillennial" influencers have had a field day with lately. The mellow yellow also gels with modern designs, acting as a near neutral when paired with wood tones, white, or black. We've even seen it whipped into palettes with cobalt blue, lavender, and poppy red to dazzling effect. Butter really does make everything better!
